Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Claims 2-4, 14-15, 19, and 22 have been cancelled; therefore Claims 1, 5-13, 16-18, 20, 21, and 23 are currently pending in application 09/808,650.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1, 5-13, 16-18, 20, 21, and 23 are rejected under 35 U.S.C. 102(b) based upon a public use or sale of the invention (Puppetools: www.puppetools.com, retrieved from Internet Archive Wayback Machine <www.archive.org>, date range: 12/22/1997- 3/1/2000).**
3. As per **independent Claims 1, 7, 16 and 23**, Puppetools discloses the elements of the claimed neurological development invention, such as: providing one or more images in a computer environment, the one or more images being provided by content providers (the web site provides the images – and is a content provider; **users can also submit images for use by others**), a remote site user (internet user) downloading selected of said one or more images to provide said images in paper form (printing); forming said paper form to create a puppet representative of said image by affixing a hinge to the paper form [a hinge attached or integrated to said paper form, said hinge being adapted for hand manipulation to create a hand actuated puppet representative of said one or more images] (pgs.9-16); and interacting with an on-line training laboratory (online training course) on

Art Unit: 3629

the puppet site (pg.7, pgs.17-21), the training laboratory comprising a plurality of developmental segments having multimedia audio and video files containing content which facilitates learning and communication in connection with play with the puppet (further disclosed in description of site under construction, pg. 4), wherein the method facilitates learning and communication by a remote site user with other remote site users and the training laboratory (pg.4, www.puppettools.com discloses the concept of a online working laboratory where a user can visit, observe, or participate; this concept is equivalent to working with other remote users as described in the specification of the instant invention); and informational sections disclose the scientific reasoning behind the puppetry play (newly referenced section of www.puppettools.com).

4. As per the remaining dependent claims 5-6, 8-13, 17-18, 20 and 21, Puppetools discloses all the claimed elements, to include printing puppets and offering detailed play instruction (www.puppettools.com).

Response to Arguments

5. Applicant's arguments filed 9/19/2006, with respect to Claims 1, 5-13, 16-18, 20, 21, and 23, have been fully considered but they are not persuasive. The rejection will remain as **FINAL**, based on the cited prior art.
6. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. The Applicant makes the argument that the prior art fails to teach or suggest facilitating learning and communication among remote site users together.
8. However, pg.12 of the specification describes the remote user interaction as a learning laboratory, which is also described by www.puppettools.com (pg.4, online working laboratory – suggests interactive group environment). The prior art does not need to teach a working model of the instant invention, it must just disclose the inventive concept.
9. Furthermore, puppettools.com discloses the ability of remote users to interact through interaction with the website (pg.6, concept log)
10. The Applicant makes the argument that the prior art fails to teach or suggest where content providers provide images for hinged puppets.
11. However, www.puppettools.com provides the obtained puppet images (equivalent to a content provider).
